THIS BOOK MAKES AVAILABLE TO THE ASPIRING POET a wide variety of poetry forms. The author, a well-known Florida poet, invites the reader to discover, in easy-to-understand language, the unique characteristics of more than thirty kinds of verse. He offers to both novice and practicing poet an opportunity to create something quite special—and quite different from traditional modern styles. John Foster is your guide on a journey to the Burmese Ya-du, the Persian Ghazal, the Senryu of Japan, the Malaysian Pantoum as well as the more familiar forms of western poetry. For each new form, the reader will find a clear example, or examples, with an explanation of how such poems are structured. An index is provided to access each distinctive poetry form.

“It’s a great delight to have John Foster’s 4th wise and witty collection, which both pleases and instructs as he leads us through exotic and intricate forms (e.g. the Clogyrnach and the Diminished Pentaverse) while commenting wittily on human behavior in general, and frailty in particular.”
